## CATALOGUE G

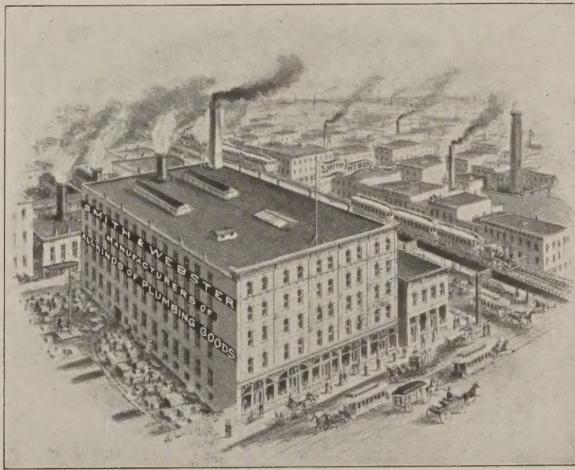

In order that architects in specifying, plumbers in purchasing, and owners in using our goods may know and feel that they are getting goods from the manufacturer, we illustrate in the following pages the interiors of some of the different departments of our works in which the goods illustrated here are made.

With every modern facility combined with care and what years of practical experience would naturally suggest, is given to all minor details—such as neat, appropriate and artistic designs, quality, finish and construction. In construction every fixture is severely simple, though thoroughly practical.

In compiling our G catalogue we have endeavored to avoid all complicated lists and superfluous additions and printed matter around the illustrations, and to make it so plain and practical that even the occasional user will not become confused or perplexed.

Respectfully,

SMITH & WEBSTER.

If with galvanized iron flush pipe, extra, \$2.50. If with hand-hole instead of vent, deduct 50c. If trap is enameled inside only, deduct \$1.00. If with hardwood cistern, extra, \$1.00.

Can furnish with 1-2 S or 3-4 S trap instead of S trap, as shown, when desired.

"ALL OUR CISTERNS ARE CONSTRUCTED ON THE NOISELESS DUPLEX SYPHON PRINCIPLE."

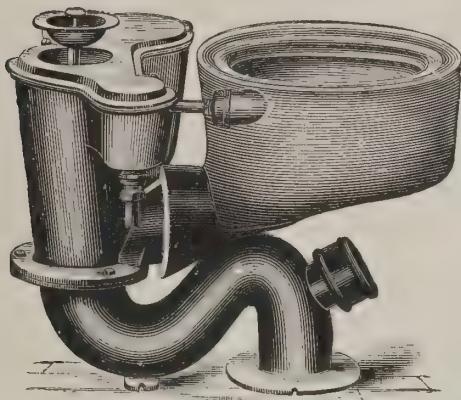

SMITH & WEBSTER'S ANTI-FREEZING HOPPER  
VALVE CLOSET—THE "VICTOR."THE  
"PIONEER" PLUNGER  
CLOSET.

PLATE 46-G. PRICE, \$12.00.

Can furnish with Trap, Offset or Straight Outlet.

Trap and Reservoir are Cast Iron, painted;  
Bowl is earthenware.

PLATE 47-G. PRICE, \$10.00.

PLATE 47-G.—Consists of "The Victor" Enamelled Anti-Freezing Hopper Closet, with Seat, Valve and Weight, as shown.

The valve of the "Victor" closet is set below the frost line, and the apparatus so constructed that when the seat is occupied the valve is opened, and the closet is being flushed. When the seat is relieved the weight pulls the seat to an upright position, the chain is slackened and the valve closed, and the water in the supply pipe between the valve and the closet, wastes, thus leaving this pipe free from water, except when the closet is actually in use.

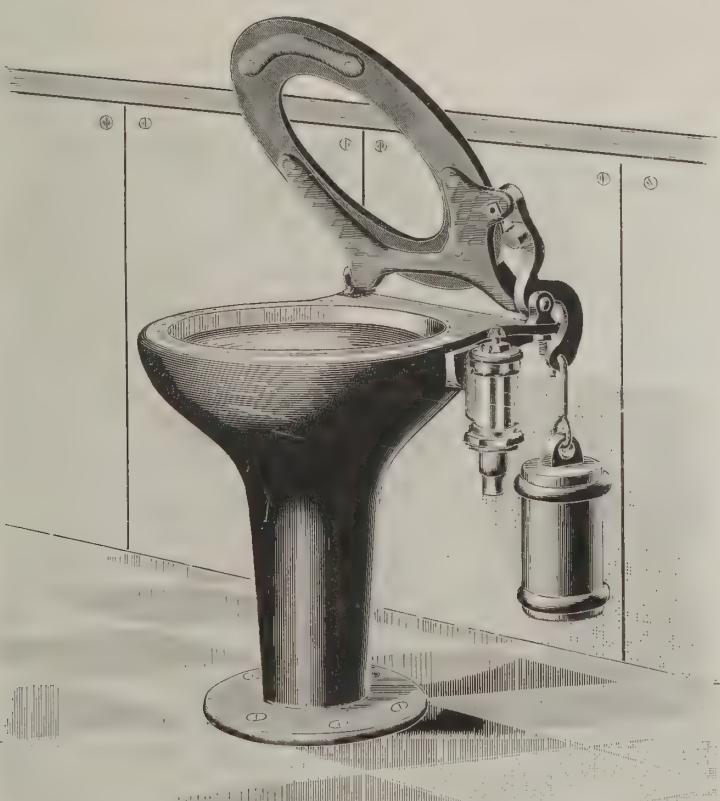

THE "NOVELTY" HOPPER VALVE CLOSET,  
WITH ROUND SEAT, SINGLE OR DOUBLE ACTING VALVE. HEIGHT, 17 INCHES.

PLATE 48-G. PRICE, ENAMELED, \$10.00.

PLATE 49-G. PRICE, ENAMELED, \$11.00.  
Can furnish above closet with 1-2 or 3-4 "S" Trap.

The "Novelty" Hopper Valve Closets works under any pressure, from 5 to 150 pounds without reaction. The single acting valve runs while the seat is occupied. The double acting valve gives a slight fore flush and a thorough after-wash when the seat is relieved.

# SMITH & WEBSTER'S WATER CLOSET RANGE,

## "THE TORRENT."

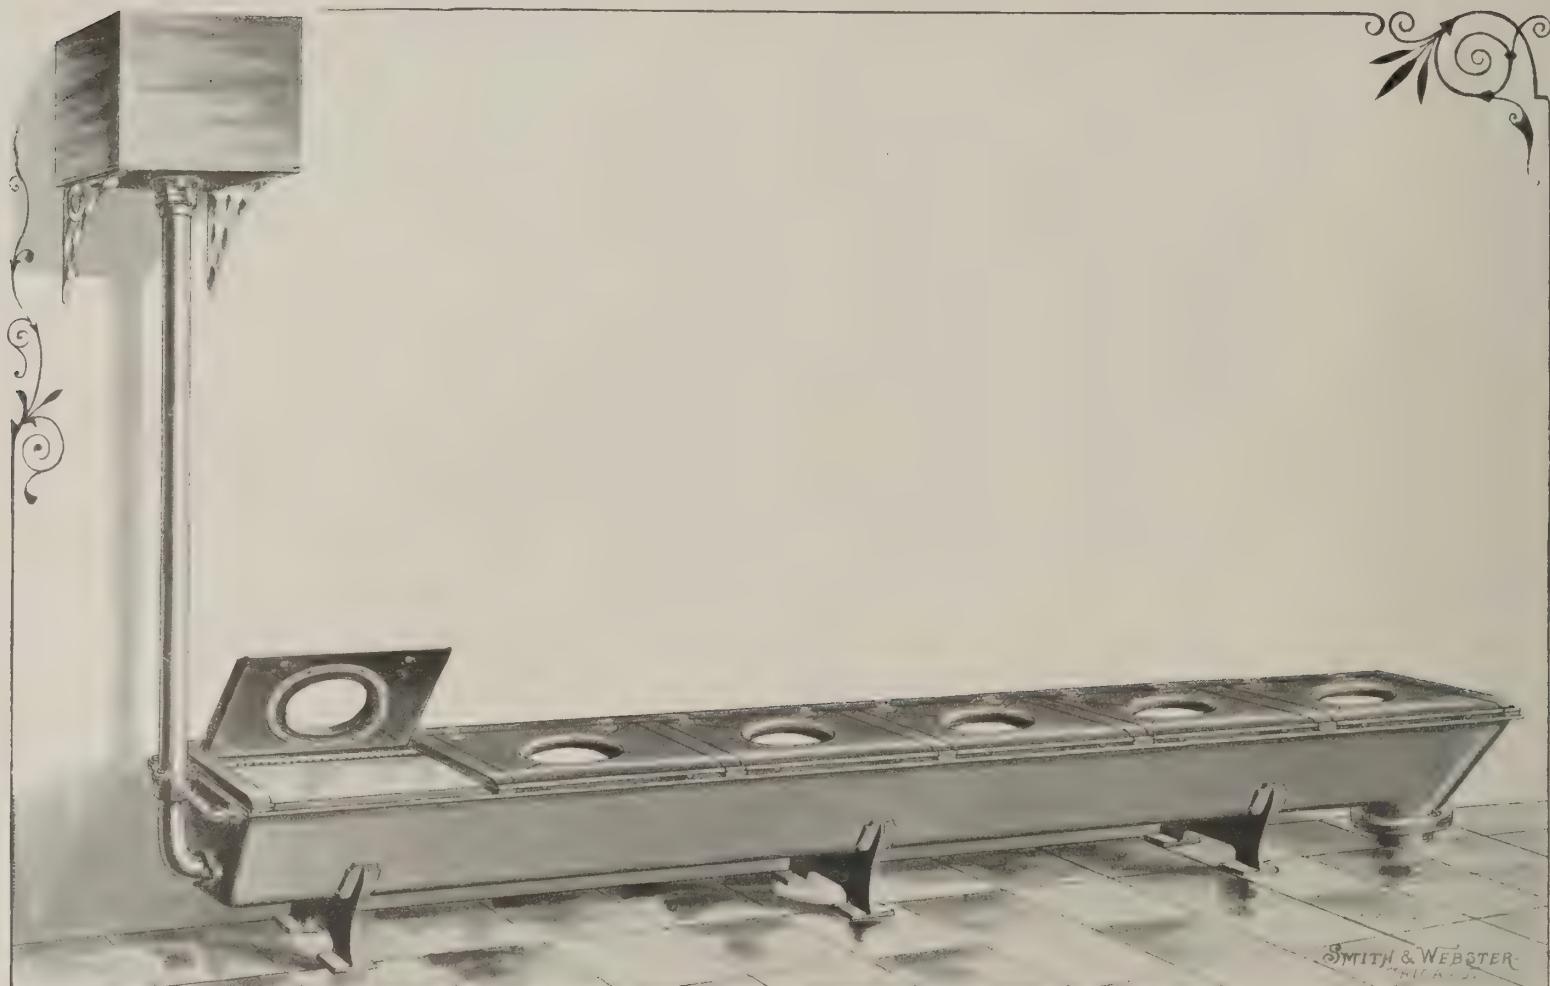

PLATE 50-G.

PLATE 50-G. Illustrates Smith & Webster's "Torrent" Water Closet Range. Fitted with heavy hardwood cabinet finished seats and frames, with heavy cast brass hinges. Shellac finish pine copper lined periodical flushing cistern, with S. & W.'s improved "Operating" and "Draining" attachments. Galvanized iron flush pipe. Perforated wash down pipes at front and back of range. Bronzed iron cistern brackets. Cast iron legs. Complete with all necessary bolts and screws. Made for seats 24, 27 and 30 inches wide.

# CHAMPION WATER HEATER

FOR HEATING WATER FOR DOMESTIC PURPOSES.

The water is heated by steam or hot water from the house-warming apparatus during the winter, without care and at no perceptible cost, and during the summer by gas or gasoline at a cost of but a few cents per day.

IT IS RAPID, SAFE, ECONOMICAL AND SATISFACTORY.

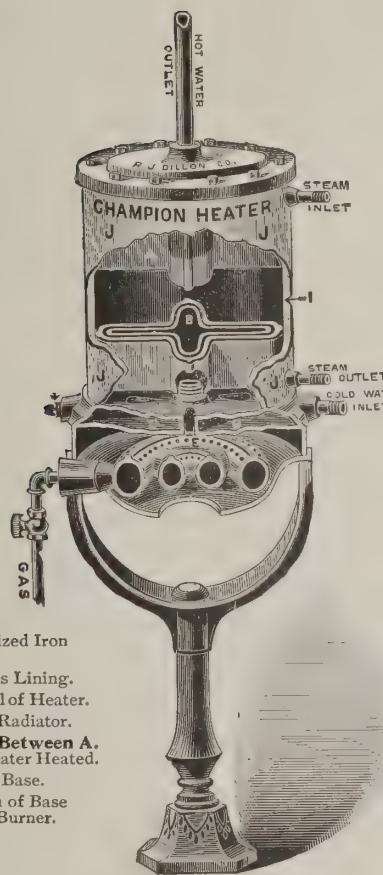

PLATE 235-G.

OPERATED BY GAS.

12	42	875	1500	190.00
14	42	1010	1800	200.00

The opening in the side of the upright tank and the opening in the end of the horizontal tank MUST BE on a LEVEL or HIGHER than the top opening in the heater, with no dips or depressions in the pipe between the heater and the tank.

Fire can be kept in self-feeders for twelve hours without attention.

## CAUTION.

1. Do not start a fire in your heater until the heater, pipes and tank are filled with water, and see that all the stop-cocks are open.

If a fire be started in the heater before it is filled with water, it is liable to be injured.

2. TO PREVENT ACCIDENTS FROM FREEZING in cold weather, it is advisable to keep up fire all night, unless the heater, pipes and tanks are first emptied of water.

3. Do not form traps in the connecting pipes between the heater and the tank, and do not reduce the size of the connecting pipes.
